Dates of Classes: March 5 - April 19

Registration Deadline: February 27

Beginning Engineering: Simple Machines that Work

#32313

Investigate mechanical engineering by building your own simple machines using five basic components such as pulleys, gears, levers, wheels and axles. Each day we will construct machines and then modify them with weights and rubber bands to explore effort, force, load, motion and mechanical advantage. *Ms. London*

Days: Monday, Mar. 5 - Apr. 16, 2012

Location: Rm #G8

Fee: \$10

Beginning Astronomy: Stargazing

#33795

Astronomy was the first science: an interest in the universe that has characterized the human race throughout recorded history. Today astronomy remains one of the most exciting and active fields of scientific research, and it is making fundamental contributions to our understanding of physical laws and our place in the universe. This class will discuss the following topics: Planets, Satellites, Solar Systems, Constellations and Deep Space Objects.
